## Complex Cases in Breast Cancer: A Multidisciplinary Discussion on January 19, 2023

Determining breast cancer treatment options begins with an accurate diagnosis from a team of pathologists and radiologists. Patients are then often treated with multiple modalities, including surgery, radiation therapy, and systemic therapy, which also incorporates the expertise of plastic surgeons and genetic counselors.

On **Thursday, January 19, 2023**, 12:15 p.m. - 1:15 p.m. (EST), a free virtual CME course offered by UFHPTI will feature a panel of seven UF Health experts discussing complex breast cancer cases, the latest research, and recommended treatments for patients: [Learn more and register online](#).
